

Data sheet

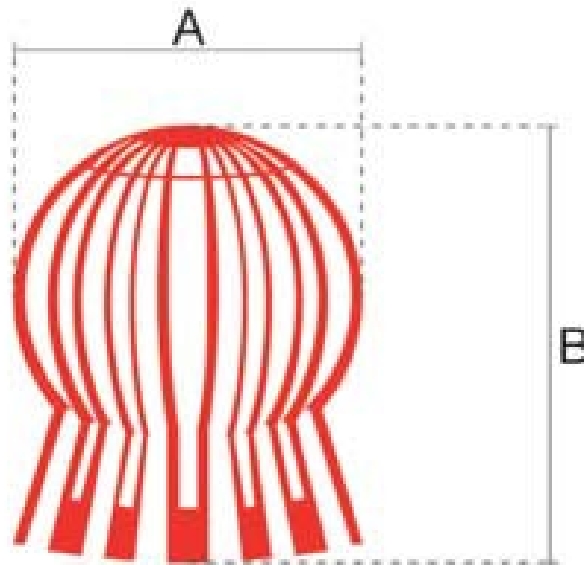

Polypropylene Universal Leaf Guard for Circular / Downpipe Roof Outlet

Function:	Plastic spring loaded leaf guards designed to stop leaves, gravel and pests entering the top of the circular drainage downpipe. This prevents blockages and assists in drainage of the roof. Squeeze the leaf guard just below the bulb shape and thrust the spokes vertically downwards into the drainage hole, release and the spring mechanism moves the spokes to grip around the inside edge of the downpipe. Regular (at least once per year) maintenance of all drainage outlets on the roof / is recommended. Dirt, leaves and other build ups should be removed and the area around the outlet deck cleaned thoroughly.		
Compatibility:	They can be used with all circular downpipes supplied by Wallbarn.		
Range:	One size fits all circular downpipe outlets.		
Performance:	Resistant to deterioration by the sun, ozone and other agents or chemicals normally found in the atmosphere. They have excellent flexibility even at low temperatures. The mechanical properties are maintained in the long term.		
Operating temperature:	-20°C; +70°C		
Included accessories:	N/A	Optional accessories:	N/A
Material:	Polypropylene		
Recycled product:	No	Recyclable:	Yes
