Product Description

A straight coupling is available for fixing an outlet with a round spigot to a round HDPE drainage pipe when the drainpipe is going in the same direction. These can be used for through-wall outlets which have a round spigot (such as units on page PVC Corner / Parapet / Through Wall Outlets) and also downpipe and circular drainage outlets (such as units on page EPDM Circular / Downpipe Outlets With Perforated Flange) The spigot again fits inside the coupling and additional secure fit can be achieved by tightening a jubilee clip around the outside.
