EPDM Circular Outlet (Smooth Flange)

Product Description

EPDM circular downpipe outlets are used to bond to EPDM sheet membranes and bituminous membranes around downpipe roof drainage outlets. The drain connector has a smooth flange to improve bonding with adhesive to the EPDM or bituminous membrane.

The slightly conical shape of the spigot enables fast and simple installation into drainpipes. There are two rings towards the top of the spigot which secures the outlet in place and prevents water rising from the inside of the drainpipe. Always prime the outlet and membrane before installation.

Compatibility

They are compatible with EPDM or bituminous membranes.

Performance

Resistant to deterioration by the sun, ozone and normal atmospheric conditions. They have excellent flexibility even at low temperatures and will not become brittle. The mechanical properties are maintained in the long term.

Operating Temperatures

-20°C; +70°C

Recycled Product

No

Material

EPDM

Recyclable

Yes
