TPE Extra Long Circular Roof Outlet (Perforated Flange)

Product Description

TPE circular downpipe outlets designed to be bonded to bituminous waterproofing membranes around roof drainage downpipes. They have a perforated flange to improve the watertight bond. The outlet is bonded in the sandwich method where it is bonded between two layers of waterproofing membrane for and over-and-under seal.

The slightly conical shape of the spigot enables fast and simple installation into drainpipes. It has two rings on the spigot to prevent water travelling upwards from the drainpipe. Always prime the outlet and membrane before installation.

Compatibility

They are compatible with APP and SBS prefabricated bituminous felts and bituminous coats.

Performance

Resistant to deterioration by the sun, ozone and normal atmospheric conditions. They have excellent flexibility even at low temperatures and will not become brittle. The mechanical properties are maintained in the long term.

Operating Temperatures

-20°C; +70°C

Recycled Product

No

Material

TPE

Recyclable

Yes
