Metal Universal Leaf Guard

Copper Leaf Guard
RO-LEAFGUARD-210-015-125-020-Z

Zinc Iron Leaf Guard
RO-LEAFGUARD-210-015-125-010-Z

Stainless Steel Leaf Guard
RO-LEAFGUARD-210-015-125-030-Z

Product Description

Spring loaded leaf guards made from different metals designed to stop leaves, gravel and pests entering the top of the circular drainage downpipe. This prevents blockages and assists in drainage of the roof.

Squeeze the leaf guard just below the bulb shape and thrust the spokes vertically downwards into the drainage hole, release and the spring mechanism moves the spokes to grip around the inside edge of the downpipe.

Regular (at least once per year) maintenance of all drainage outlets on the roof / is recommended. Dirt, leaves and other build ups should be removed and the area around the outlet deck cleaned thoroughly.

Compatibility

They can be used with all circular outlets supplied by Wallbarn.

Range

Materials: zinc-plated iron, copper, stainless steel AISI 304. One size fits all circular downpipe outlets.

Performance

Resistant to deterioration by the sun, ozone and other agents or chemicals normally found in the atmosphere. They have excellent flexibility even at low temperatures. The mechanical properties are maintained in the long term.

Operating Temperatures

-20°C; +70°C

Recycled Product

No

Material

Zinc-plated iron, copper, stainless steel
AISI 304

Recyclable

Yes
